6TH AVE., 20TH AND 21ST STS.

**HOW TO REMOVE MOLES.**  
Sodium Ethylate Gradually Dries Up the Disfigurement.

Moles on the face are now being successfully treated by the use of sodium ethylate, says the New Orleans Picayune. The mole is painted with the sodium ethylate, a fine glass rod being used.

When this mole has a varnished look the ethylate is gently rubbed in with the glass rod to make it penetrate more deeply. This mole turns nearly black and a hard crust forms over it, which is nearly three weeks in becoming detached.

When it comes off the mole is much lighter than before, and this treatment can be continued until the mark is scarcely noticeable.

**CORKERY, DOWLING & CO.,**
